Subject index

acetylcholine; chick heart, responses to, 307
acidaemia; newborn, cardiac responses to, 23
action potentials; embryonic chick heart, 307
adenine nucleotides; kidney, fetal, neonatal and, 97
adipocyte precursors; differentiation of, cell surface antigens and, 207
adrenal cortex; neonatal guinea pigs, maternal stress and development of, 467
adrenal medulla; fetus, regulation of secretion by hormones, 227
angiotensin; fetus, baroreceptor function and, 123
antibodies; placenta, cytotrophoblast and syncytiotrophoblast, 277
antigens; cell surface adipocyte differentation and, 207
ATP; fetus, depletion and breathing responses, 67

baroreceptors; fetal and neonatal function, angiotensin and, 123
blood flow; fetal, tissue responses to cooling and, 11
breathing
  fetal responses to oligomycin, 67
  fetus, intracranial pressure and, 105
  newborn, CO_2 effects on, 147
  newborn, functional residual capacity of, 167
  fetal, airway muscles and, 323
  fetus, responses to hypoxia and hypercapnia, 323
  fetal sheep, hyperthermia and, 485
breathing movements; fetus, morphine effects on, 297
breathing pattern; newborn lambs and piglets, use of inductive plethysmography, 255

calcium transport; human placenta, uptake mechanisms, 435
catecholamine secretion; fetal adrenal medulla, regulation by hormones, 227
catecholamines
  maternal plasma, placental effects of, 173
  fetal rabbits, immunosympathectomy and, 369
cooling; fetus, metabolic and hormonal responses, 55
cortisol; fetal and maternal plasma, effect of uterine blood flow, 237

electrocortical activity
  fetus, organ blood flow and, 187
  fetal sheep, effects of hypoxia on, 411
epidermal growth factor
  receptor in newborn mice, hypothyroidism and, 377
  fetal sheep, effects of lung liquid secretion, 421
  neonatal submandibular gland, thyroid and sex status and, 461

fetal heart; ventricular performance, hypoxaemia and, 159
fetus
  oxygenation, maternal CO and, 1
  cooling, blood flow responses to, 11
  renin-angiotensin system in rat, 33

fetus — *cont*
liver conversion of T_4 to T_3, control of, 43
oxygen consumption in man, 49
cooling, metabolic and hormonal responses, 55
breathing responses to oligomycin, 67
intracranial pressure, effects and increase on, 105
baroreceptors, angiotensin and, 123
lipid deposition, growth hormone and, 139
hypoxaemia, ventricular performance and, 159
metabolism, maternal catecholamines and, 173
organ blood flow, electrocortical activity and, 187
adrenal medulla, catecholamine secretion from, 227
kidney, responses to fluid intake, 259
kidney, maternal high salt diet and, 267
plasma renin activity, maternal high salt intake and, 267
heart rate, responses to prostacyclin, 283
breathing movements, morphine effects on, 297
oxygenation, maternal CO and, 1
blood flow to tissues, cooling and, 11
airway muscles, breathing and, 323
pituitary, pro-opiomelanocortin peptide localisation, 355
renin-angiotensin system in rat, 33
anti-nerve growth factor, immunosympathectomy and, 369
electrocortical and breathing in, effects of hypoxia on, 411
lung liquid secretion, EGF effects on, 421
oxygen consumption, hypercapnia and, 447
oxygenation, effects on body temperature, 477
breathing movements, hyperthermia and, 485
fluid ingestion; fetus, kidney responses to, 259

glucocorticoids; effect on tension development in neonatal heart, 333
gluconeogenesis
pregnancy, substrate supply for, 195
newborn rabbit hepatocytes, substrates for, 387
glucose transport; placental, maternal insulin and, 247
growth hormone
fetus, role in lipid deposition, 139
guinea pig lung mechanics and, 315

heart
fetus, ventricular performance, 159
newborn, contractility, 23
chick, responses to acetylcholine, 307
neonatal rate, steroid and peak tension development, 333
heart rate; in fetus and newborn, responses to prostacyclin, 283
hepatocytes; newborn rabbit, gluconeogenesis and, 387
hypercapnia; fetal sheep, effects on oxygen consumption, 447
hyperthermia; fetal sheep, effects on breathing movements, 485
hypothyroidism; effect on EGF receptor, newborn mouse and, 377
hypoxia; fetal sheep, effects of electrocortical activity on breathing, 411

immunosympathectomy; fetal rabbits, tissue catecholamines and, 369
insulin; placental glucose transport and, 247
intracranial pressure; fetus, effects of increase, 105
iron transfer; across guinea pig placenta, 347

ketogenesis; pregnancy, substrate supply for, 195

kidney
fetus, responses to fluid intake, 259
fetus, maternal high salt intake and, 267
fetal and neonatal, adenine nucleotides and, 97
fetus, maternal high salt intake and, 267
newborn dog, nutriuresis and volume expansion, 395

lipids; fetal deposition, growth hormone and, 139
liver; fetus, T_4 to T_3 conversion, 43
lung; liquid secretion in fetal sheep, EGF and, 421
lung mechanics; guinea pigs, growth hormone and, 315
lymph; newborn, flow in thoracic duct, 87

maternal; blood, oxygen capacity and placental exchange, 1
maternal stress; effects on development of adrenal cortex, 467
metabolism; fetus, responses to cooling, 55
morphine; central effects on breathing, fetal sheep, 297

natriuresis; newborn dog kidney, volume expansion and, 395
neonate
renin-angiotensin system in rat, 33
thyroid hormones in pig, 79
rat heart, peak tension development, 333
adrenocortical activity, effects of maternal stress on, 467
newborn
cardiac contractility, acideamia and, 23
lymph flow in thoracic duct, 87
sucking in preterm infant, 117
breathing movements, CO_2 effects on, 147
breathing pattern, functional residual capacity and, 167
breathing pattern, use of inductive plethysmography, 255
heart rate, responses to prostacyclin, 283
mouse EGF reeptor, hypothroidism and, 377
rabbit hepatocytes, gluconeogenesis and, 387
dog kidney, natriuresis and volume expansion, 395

organ blood flow; fetus, electrocortical activity and, 187
oxygen consumption
fetal and placental values in man, 49
fetal sheep, hypercapnia and, 447

pituitary; fetal sheep, pro-opiomelanocortin peptide localisation, 355
placenta
gas exchange, maternal CO, 1
oxygen consumption in man, 49
metabolism, maternal catecholamines and, 173
transport of 3-o-methyl glucose and, actions of maternal insulin, 247
cytotrophoblast and syncytiotrophoblast, monoclonal antibodies, 277
guinea pig, iron transfer, 347
human, calcium and choline transport, 435
plasma renin activity; fetus, maternal high salt intake and, 267
plethysmography; newborn, use in breathing pattern assessment, 255
pregnancy; gluconeogenesis, ketogenesis, substrate supply for, 195
pro-opiomelanocortin peptides; localisation in sheep pituitary, 355
prostacyclin; heart rate response to, fetus and newborn, 283

renin-angiotensin system; fetal and neonatal, rats and, 33

submandibular gland; neonatal EGF concentration, thyroid status and, 461
sucking; newborn, nutritive and non-nutritive, 117

T_4-5′ monodeiodinase; fetal liver, SH content and, 43
temperature; fetal sheep, oxygen supply, 477
thyroid hormones; neonatal pig, plasma and tissue levels, 79

uterine blood flow; maternal and fetal cortisol and, 237

Journal of Developmental Physiology, 1986, **8**, iii–vii

Contents

Number 1, February 1986

Placental gas exchange in the guinea-pig: fetal blood gas tensions following the reduction of maternal oxygen capacity with carbon monoxide
P. Christensen, J. Grønlund & A. M. Carter 1

Effect of cooling and heating on the regional distribution of blood flow in fetal sheep
T. Kawamura, R. D. Gilbert & G. G. Power 11

Acidaemia reduces cardiac output and left ventricular contractility in conscious lambs
D. J. Fisher, with technical assistance of E. Ott 23

The renin-angiotensin system in the perinatal period in rats
J. Jelinek, R. Hackenthal, U. Hilgenfeldt, G. Schaechtelin & E. Hackenthal 33

The mechanism of low serum T_3 in the fetus: heptic T_4-5′ monodeiodinase versus tissue sulfhydryl content – a clarification
S.-Y. Wu, D. H. Polk, A. H. Klein & D. A. Fisher 43

Estimation of human fetal-placental unit metabolic rate application of the Bohr Principle
D. R. Bonds, B. B. Gutsche & S. G. Gabbe 49

Metabolic and hormonal responses to cooling the fetal sheep *in utero*
T. R. Gunn, J. Butler & P. Gluckman 55

Fetal breathing movement, sleep state and cardiovascular responses to an inhibitor of mitochondrial ATPase in sheep
B. J. Koos, H. Sameshima & G. G. Power 67

Number 2, April 1986

Simultaneous observations of iodothyronine content in the thyroid gland, plasma and thyroxine 5′- and 5-monodeiodinase activity in liver, during the neonatal period of the pig
E. Brzezińska-Ślebodzinska & A. B. Ślebodzinski 79

Thoracic duct lymph flow: a comparative study in newborn and adult sheep
B. Harake & G. G. Power 87

Perinatal changes in adenine nucleotide content of developing rat kidney
J. Bastin, F. Sofack, H. Boulekbache, J. Bismuth & J. P. Geloso 97

The effects of raising intracranial pressure on breathing movements, eye movements and electrocortical activity in fetal sheep
D. W. Walker & R. Harding 105

Nutritive and non-nutritive sucking in preterm infants
H. Daniels, H. Devlieger, P. Casaer, M. Callens & E. Eggermont 117

Angiotensin I and II in the assessment of baroreceptor function in fetal and neonatal sheep
G. C. Scroop, J. D. Marker, B. Stankewytsch-Janusch & R. F. Seamark 123

Lipid deposition after hypophysectomy and growth hormone treatment in the sheep fetus
D. Stevens and G. Alexander 139

Number 3, June 1986

The effect of carbon dioxide inhalation on phase characteristics of breathing movements in healthy newborn infants
D. Andersson, G. Gennser & P. Johnson 147

Right venticular function in the hypoxaemic fetal sheep
M. D. Reller, M. J. Morton & K. L. Thornburg 159

Influence of breathing pattern on functional residual capacity in sleeping newborn infants
H. Walti, G. Moriette, M. F. Radvanyi-Bouvet, M. Chaussain, F. Morel-Kahn, N. Pajot & J. P. Relier 167

The effect of elevation of maternal plasma catecholamines on the fetus and placenta of the pregnant sheep
W. Gu & C. T. Jones 173

Changes in organ blood flow between high and low voltage electrocortical activity in fetal sheep
A. Jensen, O. S. Bamford, G. S. Dawes, G. Hofmeyr & M. J. Parkes 187

Adaptation of hepatic gluconeogenesis and ketogenesis to altered supply of substrates during late pregnancy in the rat
C. Rémésy & C. Demigné 195

Studies on the expression of adipocyte-specific cell surface antigens during the differentiation of adipocyte precursor cell *in vitro*
S. R. Lee, R. K. Tume, J. Cryer & A. Cryer 207

Number 4, August 1986

Catecholamine secretion from the adrenal medulla of the fetus, regulation by hormones
A. D. M. Graham, L. D. Longo & C. Y. Cheung 227

Effect of reduced uterine blood flow on fetal and maternal cortisol
A. D. Bocking, I. C. McMillen, R. Harding & G. D. Thorburn 237

Maternal insulin and placental 3-o-methyl glucose transport in near-term sheep
J. H. G. Rankin, G. Jodarski & M. R. Shanahan 247

Calibration of respiratory inductive plethysmography in spontaneously breathing lambs and piglets
R. H. Warren & S. H. Alderson 255

The renal response to the ingestion of fluid by the fetal sheep
F. G. Smith, E. R. Lumbers & G. J. Kesby 259

Effect on maternal and fetal renal function and plasma renin activity of a high salt intake by the ewe
A. D. Stevens & E. R. Lumbers 267

Monoclonal antibodies to cytotrophoblast and syncytiotrophoblast of human placenta
S. R. Contractor & S. R. Sooranna 277

Age dependent heart rate responses to prostacyclin (PGI_2) in unanaesthetized fetal and neonatal sheep
G. C. Scroop, J. D. Marker & A. A. Martin 283

The central effects of morphine on fetal breathing movements in the fetal sheep
L. Bennet, B. M. Johnston & P. D. Gluckman 297

Number 5, October 1986

Development of physiological responses to acetylcholine during organ culture of young embryonic chick hearts
L. Dong, N. Sperelakis & G. M. Wahler 307

Lung mechanics in growing guinea-pigs treated with growth hormone
C. Gaultier, A. Harf & F. Girard 315

Genioglossus and alae nasi activity in fetal sheep
B. M. Johnston, T. R. Gunn & P. D. Gluckman 323

Mechanical responses of developing Fisher rat heart. Effects of steroid hormone
Z. J. Penefsky, J. Wolfe, O. Greengard & J. Bernstein 333

A study of the relationship between placental non-haem iron and iron transfer in the guinea pig: the maturation of the transfer process
J. P. van Dijk, B. K. van Kreel & J. W. A. Heeren 347

Immunocytochemical localization of proγMSH, γMSH, ACTH and βendorphin/β lipotrophin in the fetal sheep pituitary: an ontogenetic study
H. M. Mulvogue, I. C. McMillen, P. M. Robinson & R. A. Perry 355

Autoimmune sympathectomy in fetal rabbits
J. F. Padbury, R. W. Lam, D. H. Polk, J. P. Newham, J. Lakshmanan & D. A. Fisher 369

Epidermal growth factor receptor ontogeny in mice with congenital hypothyroidism
J. Alm, S. Scott & D. A. Fisher 377

Development of gluconeogenesis from different substrates in newborn rabbit hepatocytes
P. H. Duée, J. P. Pégorier, L. El Manoubi, P. Ferré, B. Bois-Joyeux & J. Girard 387

Lack of anion effect on volume expansion natriuresis in the developing canine kidney
J. M. Lorenz, L. I. Kleinman & Theresa A. Disney 395

Number 6, December 1986

Effects on moderate hypoxia on fetal electrocortical activity, eye movements, and breathing activity in sheep
H. Sameshima & B. J. Koos 411

Effect of epidermal growth factor on lung liquid secretion in fetal sheep
K. A. Kennedy, P. Wilton, M. Mellander, J. Rojas & H. Sundell 421

Evidence for saturable uptake mechanisms at maternal and fetal sides of the perfused human placenta by rapid paired-tracer dilution: studies with calcium and choline
J. H. Swiery, K. R. Page, C. B. Dacke, D. R. Abramovich & D. L. Yudilevich 435

Fetal oxygen consumption and PO_2 during hypercapnia in pregnant sheep
D. W. Rurak, C. C. Cooper & S. M. Taylor 447

Effect of thyroid hormone and sex status on epidermal growth factor concentrations in the submandibular gland of a congenitally hypothyroid mouse model
S. M. Scott, J. Alm & D. A. Fisher 461

Effects of prenatal maternal stress on the pituitary adrenocortical reactivity in guinea pig pups
R. Cadet, P. Pradier, M. Dalle & P. Delost 467

Temperature responses following ventilation of the fetal sheep *in utero*
G. G. Power, T. Kawamura, P. S. Dale, H. Schroder & R. D. Gilbert 477

Effects of hyperthermia on fetal breathing movements
D. W. Walker & A. N. Davies 485
